Physics

Q.1 A particle moves with constant acceleration. What is the relation between velocity and time?

(A) $v = u + at$

(B) $v = u - at$

(C) $v = u + at^2$

(D) $v = u^2 + at$

Q.2 If $a = 4\ m/s^2$ and $t = 4\ s$, starting from rest, what is the final velocity in m/s?
